

Authentication

1. Register Owner

Endpoint:

POST /api/v1/auth/owner/register

Request Body (JSON)

```
{
  "email": "owner@gmail.com",
  "password": "password123"
}
```

2. Register Renter

Endpoint:

POST /api/v1/auth/renter/register

Request Body (JSON)

```
{
  "email": "renter@gmail.com",
  "password": "password123"
}
```

3. Login Owner

Endpoint:

POST /api/v1/auth/owner/login

Request Body (JSON)

```
{
  "email": "owner@gmail.com",
  "password": "password123"
}
```

4. Login Renter

Endpoint:

POST /api/v1/auth/renter/login

Request Body (JSON)

```
{
  "email": "renter@gmail.com",
  "password": "password123"
}
```

5. Logout

Endpoint:

POST /api/v1/auth/logout

Headers

Key	Value
Authorization	Bearer {token}

Owner Profile

1. Lihat Profil Owner

Endpoint:

GET /api/v1/owner/profile

Headers

Key	Value
Authorization	Bearer {token_owner}

2. Upload KTP Owner (KYC)

Endpoint:

POST /api/v1/owner/profile/kyc

Headers

Key	Value
Authorization	Bearer {token_owner}

Body (form-data)

Key	Type	Value
full_name	Text	Budi Santoso
nik	Text	1234567890123456

Key	Type	Value
ktp_image	File	foto.jpg

Renter Profile

1. Lihat Profil Renter

Endpoint:

GET /api/v1/renter/profile

Headers

Key	Value
Authorization	Bearer {token_renter}

2. Upload SIM Renter (KYC)

Endpoint:

POST /api/v1/renter/profile/kyc

Headers

Key	Value
Authorization	Bearer {token_renter}

Body (form-data)

Key	Type	Value
full_name	Text	Andi Wijaya
nik	Text	6543210987654321
license_no	Text	SIM-123456
sim_image	File	sim.jpg

Vehicles (Owner)

1. Tambah Kendaraan

Endpoint:

POST /api/v1/owner/vehicles

Headers

Key	Value
Authorization	Bearer {token_owner}

Request Body (JSON)

```
{
  "brand": "Toyota",
  "model": "Avanza",
  "daily_rate": 350000,
  "latitude": -2.9761,
  "longitude": 104.7754
}
```

2. Lihat Semua Kendaraan

Endpoint:

GET /api/v1/owner/vehicles

Headers

Key	Value
Authorization	Bearer {token_owner}

3. Update Kendaraan

Endpoint:

PATCH /api/v1/owner/vehicles/{id}

Headers

Key	Value
Authorization	Bearer {token_owner}

Request Body (JSON)

```
{
  "daily_rate": 400000,
  "status": "maintenance"
}
```

4. Hapus Kendaraan

Endpoint:

DELETE /api/v1/owner/vehicles/{id}

Headers

Key	Value
Authorization	Bearer {token_owner}

Search (Renter)

1. Cari Kendaraan Terdekat

Endpoint:

GET /api/v1/renter/vehicles/search

Query Parameters

Parameter Contoh

latitude	-2.9761
longitude	104.7754
radius	10

2. Detail Kendaraan

Endpoint:

GET /api/v1/renter/vehicles/{id}

Bookings

1. Buat Reservasi

Endpoint:

POST /api/v1/renter/bookings

Headers

Key	Value
Authorization	Bearer {token_renter}

Request Body (JSON)

```
{
  "vehicle_id": 1,
  "start_date": "2026-06-01",
```

```
    "end_date": "2026-06-04"
  }
```

2. Riwayat Sewa (Renter)

Endpoint:

GET /api/v1/renter/bookings

Headers

Key	Value
Authorization	Bearer {token_renter}

3. Pesanan Masuk (Owner)

Endpoint:

GET /api/v1/owner/bookings

Headers

Key	Value
Authorization	Bearer {token_owner}

4. Approve / Reject Booking

Endpoint:

PATCH /api/v1/owner/bookings/{id}/status

Headers

Key	Value
Authorization	Bearer {token_owner}

Request Body (JSON)

```
{
  "status": "confirmed"
}
```

Reviews

1. Tambah Ulasan

Endpoint:

POST /api/v1/renter/reviews

Headers

Key	Value
